

A message from Sean Martin

People have been asking me for over a week how can they help or what can they do? The waiting is over here's what you can do to help and make a difference. It's time to write or call your County Commissioners, Congressmen and Senators. Now comes the hard part, people actually have to follow thru and do it.... Take 5 minutes and make a call. Take 5 minutes and write and email. 5 minutes is all it takes. How much money and time do you spend on your sport? How can it not be worth 5 minutes to help make sure that you can still do it next year at this time? Don't be the person that thinks "I'll do it later" or "I'm too busy and 1 letter doesn't really matter". One letter does matter, because if everyone takes that attitude it doesn't take long before one letter turns to 10 then to 100 and so on. One letter at a time can turn into a thousand if people, follow thru and do it. Don't be the one who puts it off and lets this slip by. This thing is still very much in our grasp. If we stop their proposal now, it never makes it to the next level.
